

Required and optional software for the shortcourse

- <https://julialang.org/downloads/>
 - Allow to install and use MAGEMinApp and MAGEMin_C

- Visual Studio Code – Code editor <https://code.visualstudio.com/>
 - Excellent programming environment for any language
 - Perfect to program MAGEMin_C.jl scripts!

- <https://inkscape.org/fr/>
 - Allow to open MAGEMinApp figure vector format (svg)

Free/Open source

- <https://www.adobe.com/products/illustrator.html>
 - Allow to open MAGEMinApp figure vector format (svg)
 - Vectors need clean-up!

Licensed

Julia installation

**Windows,
Mac and Linux**

Julia installation – Launch terminal

Windows

→ Right click
→ Run as administrator

Powershell

Mac

Terminal

Launchpad

Julia installation - <https://julialang.org/install/>

Windows

Install juliaup from the [Microsoft Store](https://microsoft.com/store) by running this in the command prompt:

```
winget install --name Julia --id 9NJNWW8PVKMN -e -s msstore
```

PowerShell

If Winget is not installed/activated, first paste the following command in the PowerShell:

```
Add-AppxPackage -RegisterByFamilyName -MainPackage  
Microsoft.DesktopAppInstaller_8wekyb3d8bbwe
```

Linux/Mac

Install juliaup by running this in your terminal:

```
curl -fsSL https://install.julialang.org | sh
```

Terminal

Once installed close and relaunch the PowerShell/Terminal (this updates user's environment)

MAGEMinApp & MAGEMin_C installation

Windows
Mac and Linux

Install MAGEMinApp

- Open a new terminal (vscode for those who use it, or **terminal/powershell** for others)

Install MAGEMinApp

```
julia -t 6                # launches Julia in parallel

julia> ]                  # opens the package manager
pkg> add MAGEMinApp       # MAGEMin_C
```

A screenshot of a terminal window showing the installation of MAGEMinApp. The terminal has a dark background with green and blue text. It shows the user running 'julia -t 6' and then entering the package manager prompt ']' followed by 'pkg> add MAGEMinApp'. The package manager displays a ASCII art logo for Julia, version information (1.10.0), and documentation links. The user's cursor is at the end of the command 'add MAGEMinApp'.

```
seph42@DESKTOP-2V82075:~$
seph42@DESKTOP-2V82075:~$ julia -t 6

Documentation: https://docs.julialang.org
Type "?" for help, "]"?" for Pkg help.
Version 1.10.0 (2023-12-25)
Official https://julialang.org/ release

(@v1.10) pkg> add MAGEMinApp
```

- In the terminal type **]** this will open the package manager
- Then type **add MAGEMinApp** this will download and install MAGEMinApp
- Once installed, quite the package manager by typing BACKSPACE/delete key

Launch MAGEMinApp

Load MAGEMinApp

```
julia> using MAGEMinApp    # load MAGEMinApp
julia> App()
```

- The following text will be displayed in the terminal:

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
seph42@DESKTOP-2V82075:~$ julia -t 6
